Contours

 [CHECK FULL SIZE IMAGES @ ADMIRA.SG](#)

The brand-new Contours collection presents realistic wood laminates with synchronized surface texture, which assures realism at its finest.

Contours accentuates the natural texture and contrast of wood finishing. The surface's colour intensity creates an authentic depth that resembles the rustic aesthetics of actual wood.

Admira's synchronized laminates are robust, lightweight and eco-friendly.

XTREME MATT HPL captivates like never seen before. Enormous colour transparency and depth with a comfortably warm, velvety soft feel.

This low-reflection surface invites you to touch it without leaving any traces behind from fingerprints, or any hand traffic grease.

The electron beamed cured surface reflects its metallic polished look that suits contemporary living.

The looks will not deceive you - it is an extremely robust, durable and easy-care high-pressure laminate.

Bespoke

Admira is a proponent of originality within the local art scene.

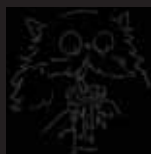

Bespoke is a collection of uniquely-designed laminates by Singapore's budding artists. This collaborative project aims to create buzz in the promising and ambitious design industry.

To launch Bespoke, Admira is one of the first to produce colourable laminates by teaming up with a rising local artist - Trivialities.

About Artist

Trivialities is the brainchild of Trivia Goh. Creator of the imaginary, whimsy and adorkable, Trivia Goh is a Singapore-based artist illustrator whose works revolve around otherworldly characters and places; as if to document them having had a place in her casual daydreaming world. Often, these flights of fancy are brought into our reality in the form of paintings or handmade resin toys.

HOW ARE ADMIRA LAMINATES MADE?

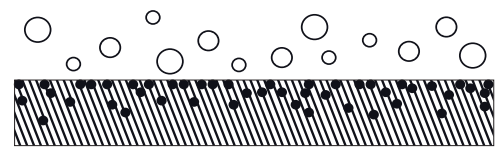

ADMIRA's range of High Pressured Laminates (HPL) are made up of several different layers of paper types soaked in chemical resins which are then compressed under heat and high pressure during production. Hence, this surface material inherits a durable unique water-proof surface, easy to maintain with high scratch and stain resistance, and certified with Class 0 fire resistance material rating.

MEETING DESIGNERS' FLEXIBILITY

Suitable for various bench tops and door panel designs. Use **ADMIRA** post-form grade laminates with unique resin content properties to allow bending of the laminated edges to a radius of 3-5mm without cracking or breaking; thus adding dramatic curves and modern bends to your intended designs.

GOING NANO TO FIGHT HARMFUL BACTERIA

ADMIRA's anti-bacterial grade laminates are produced using silver-nano particles in the surface layers that eliminates up to 99% of harmful bacteria on contact. Even bacteria such as **Methicillin Resistant Staphylococcus Aureus (MRSA)**, which are resistant to antibiotics are annihilated when in contact. These surfaces are effectively applicable to the healthcare, F&B and educational sectors where hygiene standards is a prime consideration.

GREEN LABEL FOR A GREENER FUTURE

ADMIRA HPL as an eco-surface material, has a low toxicity eco-content and made under strict manufacturing processes to provide improved indoor environmental usage.

#042-002
ENVIRONMENTALLY
PREFERRED LAMINATE

MATCHING EDGE-BAND SOLUTIONS

ADMIRA supplies design-matched **PVC Edge-band** options (in strip width of 23mm and 45mm, and a thickness ranging from 0.8mm to 1mm) to complement most of the laminate designs and create seamless edges. Matching edge-band solutions are subjected to availability and clients are advised to enquire for a sample to confirm suitability for project usage.

MARINE GRADE

ADMIRA HPL complies with the Fire Protection requirements set by **Marine Equipment Directive (MED)** and are certified by **DNV** and **CSI Spa** as a low flame spread surface material that does not generate excessive amount of smoke or toxic products in fire; a preferred material for marine applications.

CLEANING & CARING TIPS

A major advantage of **ADMIRA's** laminate surfaces is that cleaning is so simple and easy. Usually, a moist cloth is sufficient for cleaning, and using a regular dish-washing liquid is more than sufficient to get rid of any greasy stains.

For more stubborn stains, they can be removed with an organic solvent such as methylated spirits or alcohol. Brushes with hard bristles (not wired brushes) may also be used for soft scrubbing.

We do not encourage any application that the laminate surface is not designed for. For example, abusing the laminate surface as a chopping board, placing hot cookware directly onto the **HPL** surface, exposing the **HPL** to open flames, and applications to outdoor areas under direct sunlight.

Proper maintenance and care for **ADMIRA HPL** surfaces will ensure that the material will retain their original protective functions for many years.

CLASS "0" FIRE RATED MATERIAL

ADMIRA HPL are tested by **TÜV SÜD PSB** for both fire propagation and surface spread of flame performance and have achieved Class "0" optimum fire resistance properties. Kindly contact us for test reports and documents.

RESISTANCE TO IMPACT	JIS K 6902 - 12.2 (large ball)	Min. 30cm
	EN 438-2 / EN-438 - 2.20 (small diameter ball - spring force)	≥ 15-20 N
RESISTANCE TO DRY HEAT	JIS K 6902 - 8.2	Min. 3 (gloss finish) / Min. 4 (other finishes)
	EN 438-2 / EN-438-2.16 (180°C)	≥ 3 (smooth finishes)/ ≥ 4 (textured finishes)
RESISTANCE TO IMMERSION IN BOILING WATER	JIS K 6902 - 7	Mass increase: max. 17% Thickness increase: max. 19% Appearance: min. 4
	EN 438-2 / EN-438 - 2.12	Min. ≥ 3 (smooth finishes)/ Min. ≥ 4 (textured finishes)
COLOUR FASTNESS	JIS K 6902 - 16.4	Appearance: min. 3 lab colour difference Δ E 3.0 max.
	EN 438-2 / EN-438 - 2.27 (xenon arc light/contrast)	Grey scale: min. ≥ 4
DIMENSIONAL STABILITY	JIS K 6902 - 9.2 (high temperature)	Long: max. 0.7% / Trans: max. 1.2%
	EN 438-2 / EN-438 - 2.17 (elevated temperature)	Length/Long: ≤ 0.55% - Width/Trans: ≤ 1.05%
RESISTANCE TO CIGARETTE BURNS	JIS K 6902 - 17.2 (electric heater)	45 seconds min.
	EN 438-2 / EN-438 - 2.30 (appearance rating)	Min. ≥ 3
RESISTANCE TO ACCELERATED WEATHERING	ASTM G154: 2006 (8 hrs. QUV and 4 hrs. Condensation) No loss of gloss. No cracking or delamination	
FIRE RATED CLASS 0	Fire Propagation: BS 476: Part 6: 1989 + A 1: 2009 Surface Spread of Flame: BS 476: Part 7: 1997 (Class 1)	
SINGAPORE GREEN LABEL SCHEME	SGL #042-038-2160 - Environmentally Improved Low Emission - Low Toxicity	
	SGL #042-002-1241 / SGL #042-002-1243 - Environmentally Preferred laminate	
MARINE GRADE CERTIFICATION	DET NORSKE VERITAS (DNV) EC Type Examination Certificate (Module B) MED-B-9378 QS-Certificate of Assessment-EC (Module D) MED-D-1798	
	CSI S.p.A - CSI CERT EC Certificate of Type Examination MED/0497/452/14	

*** MATERIAL USED IN TESTING**

1. Tea
2. Coffee
3. Milk
4. 1% alcohol solution in iodine

5. Edible vinegar
6. 10% water solution of citric acid
7. Gasoline
8. Acetone
9. Olive Oil

10. 10% aqueous ammonia
11. Crayon (Black)
12. Shoe Polish (Black)
13. 0.01% aqueous solution of red food colouring #102
14. Ink (Blue/Black)

15. 2% solution of mercurochrome
16. 5% solution of phenol
17. Aqueous solution of acid sodium sulfate
18. Soy sauce

DISCLAIMER & WARRANTY

Clients are advised to reconfirm the selected designs, corresponding colour codes and material attributes with ADMIRA's representatives prior to ordering. ADMIRA will not be responsible for any claims resulting in errors in this catalogue, or from the sample selection process. ADMIRA ensures that its surface products are reasonably free of defects upon delivery with compliance to its strict material properties and quality controls. Customers are advised to examine the HPL quality before installation for any noticeable manufacturing defects. Should there be any inherent defects not due to mishandling or improper installation, ADMIRA's liability will be limited to the replacement of products only. Colours and patterns of the laminate sheets in this catalogue and on our digital platforms may vary from actual laminate pieces.
